Item 4: (20 points) Identify the keyword and the type of information it belongs

YYY need to get visit a cardiologist due to the recent high blood pressure experience that she encountered because of the alleged involvement in a rape case of her son DDD to a 7 year old minor GGG who happens to be their neighbor. YYY filled out a patient record card as its her first visit. She was asked to provide her full name, age, date of birth, marital status, address, contact number, parents name (father's name), mother's maiden name) and medical history of both parents. Her mother as diabetic type 2 and the father has Hypertension and Asthma. AAA told the doctor during her turn that the incident happen when their neighbor QQQ reported to the police that her son DDD allegedly raped GGG. She said that her son did not raped GGG but rather it was just a peaceful and normal play amongst children. Her son DDD actually just acted like the doctor who performed an Annual Physical Medical Exam to GGG as role play. Because

of the incident being brought to the attention of the police, YYY's blood pressure shoot up because of panic. Accordingly she said that she likes to eat some chicharron bulaklak and sleepless due to her multiple work as a network engineer and a law student. The doctor prescribed to her to take Isordil 5mg as needed on full stomach for 1 month. Repeat visit after 1 month. She was also prescribed to go to an ecg, 2d echo and treadmill stress test.

Item 5: (10 points) List down the steps and requirements
